SMART FLOOR

INTERACTIVE FLOOR

smartfloor.edu.pl/en

Why is it so unusual?

1

Because it's the only multi-interactive floor on the market that allows you to control the image with movement, hand, a special light pen, a tablet and an interactive robot....

2

...because we offer a dedicated mobile stand, which allows it to be moved freely to different places...

3

...because we provide you more than 650 worksheets to start with, you can easily expand your panel with additional applications, thanks to a convenient platform motioncube.io

SmartFloor 2in1: table, floor and more!

The interactive table has been prepared with older children, adults and wheelchair users in mind. Specially selected packages of applications and games allow to create a game zone, a calming room for people on the autism spectrum, or a recreational and therapeutic space. The solution also supports pedagogical and special education, aiding in the training of future teachers.

R&D

We focus on development, so we are currently conducting 3 research and development projects, which in the future will bring new interactive solutions and upgrade the existing ones. Our team consists of high-class engineers and designers who, together with the R&D department, watch over the continuous improvement and expansion of our offerings.

Own production

As a manufacturer, we have our own production line and modern machinery. Thanks to the fact that the products are created at our company, we can approach comprehensively to the customer's needs, providing a product of the highest quality, tailored to the educational market.

For everyone

Our challenge is to adapt products for the needs of people with disabilities. We want to make them accessible primarily for students with SEN - equalizing their educational opportunities, raising the level of efficiency of teaching, including in the teaching processes.

We are on Bett, let's talk!
